Reinforce SAP GRC with bioLock MFA4SAP

SASOL Oil - Case Study Finance Approval

The SASOL Enterprise Risk Management (ERM) Framework sets the foundation for the business to effectively manage their risks in a standard and systematic manner to prevent fraud.

Key Business Outcomes:

- Biometric 2nd factor truly identifies and confirms authorized users
- Biometric GRC's reduce risk of false factor Authentication
- The SAP Digital Signature must be confirmed with a legitimate user
- Both users now provide biometric consent to control each other
- The risk team receives immediate email alerts allowing instant actions
- All activities are recorded in a single for indisputable accountability
